SKILLS

- **Languages**: C, C++, Java, JavaScript, PHP, Python
- **Frameworks**: HTML and CSS, NodeJS, React, Express, Tailwind CSS
- **Tools/Platforms**: MySQL, MongoDB, Figma
- **Soft Skills**: Problem-Solving, Team Player, Project Management, Adaptability

PROJECTS

- **Event Management System | Github** April 2025 – May 2025
- Built an interactive Event Management System enabling administrators to announce, coordinate, and supervise multiple events smoothly and efficiently across the platform.
- Designed a responsive and user-centric interface using HTML and Tailwind CSS to enhance navigation flow, accessibility, and visual consistency across the platform.
- Developed robust backend logic in PHP with optimized MySQL schemas to regulate event records,participant details, and administrative operations across the platform.
- Streamlined database performance, resolved operational bottlenecks, and strengthened overall system stability to support high-volume event registrations across the platform.

Tech Stack : HTML, Tailwind,CSS,PHP

- **AI-Based Image Enhancer | Github** Since October 2025
- Architected and launched an AI-powered image enhancement solution that performs automatic sharpening, restoration, and quality improvement through the PicWish API.
- Created a clean and user-friendly React interface enabling seamless image selection, real-time previews, enhancement execution, and file retrieval.
- Orchestrated API communication using Axios, ensuring precise request handling and efficient response processing for AI-driven image transformations.
- Conducted thorough validation and performance tuning to ensure stable outputs, reduced processing errors, and noticeable improvements in image sharpness and resolution.

Tech Stack : React.js, JavaScript (ES6+), HTML5, CSS3, Axios, PicWish Image Enhancement API

TRAINING

- **Summer Training — Basics of Data Structures and Algorithms (LPU)** June 2025 – July 2025
- Completed a rigorous training program focused on building a strong conceptual understanding of fundamental data structures and algorithmic principles.
- Practiced algorithmic techniques related to sorting, searching, recursion, and complexity evaluation to improve computational efficiency.
- Gained hands-on exposure to working with essential data structures such as arrays, linked lists, stacks, queues, trees, and graphs through practical exercises.
- Tackled diverse coding challenges of varying difficulty, enhancing analytical thinking, logical breakdown, and designing precise solutions within time and performance constraints.
- Enhanced coding discipline by writing clean, maintainable solutions and systematically resolving errors to improve overall programming competence.

CERTIFICATES

- Master in generative AI & Generative AI tools | Link August 2025
- Java Programming - 72 hours (iamneo,LPU) | Link May 2025
- Data Structure & Algorithms - 72 hours (iamneo,LPU) | Link December 2024
- Object Oriented Programming – 72 hours (iamneo,LPU) | Link December 2024

CO-CURRICULAR ACTIVITIES

- **LPU X WebHackathon**: March 2025
  Participated in a competitive LPU X Web Hackathon.
- **Seminar on Career Enhancement:** September 2024
  Attended an expert-led Seminar on Career Enhancement.
- **3 day Web Development Bootcamp:** March 2024
  Completed workshop and developed practical web skills effectively.

EDUCATION

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering ***CGPA: 7.93*** *Since August 2023*
- **Central Public School** Jharkhand ,India
  Intermediate; ***Percentage: 60.6%*** *April 2021 - March 2023*
- **S.T Xaiver's School** West Bengal, India
  Matriculation; ***Percentage: 85.8%*** *April 2020 - March 2021*
